

FULL COPPER 2+1 CCTV CABLE C1

CCTV 2+1 Full Copper

2x0,22mm

100 mt (Standard)

CCTV cable types are two types in terms of transmitting audio signal. While 2 + 1 camera cables can only transmit sound and power, it is possible to transmit sound signals with 4 + 1 camera cables besides image and energy. 2 + 1 CCTV camera cable is the cable type used for image signal and power transmission. The energy required for the operation of the camera system is provided through this cable. In addition, the image taken from the camera is transferred to the monitor or recorder via this cable.
