Communication Function

Makim D 10 Proximity Card Reader is used for access control applications with its 30.000 user capacity and stylish design. It works with card and password, with its 50.000 log capacity and it has door-turnstile opening function via relay (dry contact). D 10 provides fast operation with a reading speed under 20ms for 30.000 user.

TCP/IP communication provides access to all log information, entry-exit data, employee-based authorization, and all reports like daily, weekly and monthly reporting. Through USB connection, log data can be downloaded from the device. D 10 can also be connected to panel through wiegand in/out.

The device works with 12 V power and it gives sound alarm with its built-in buzzer in every transaction. With all these features, D 10 Proximity Card Reader is suitable for not only small business centers, accommodation places or buildings but it also suitable for big factories, storage rooms, banks, prisons and similar industrial and commercial locations.
