

K 280 M EXPROOF MAGNETIC LOCK

Magnetic Locks are used in all doors requiring security such as building entrances, office doors. It can be easily controlled with remote control, encrypted unit, button and motion sensors. These systems, which are produced electronically, provide control at the entrance door. These products, which operate with a magnet-like system, require electricity to be activated. Exproof magnetic locks pecifically designed for applications where flammable vapors are cause for concern, like clean room, chemical plant, or refinery environments by eliminating the spark or arc in the magnetic lock.
