

CMR 500

MF 13.56 MHZ FINGER PRINT TERMINAL

Makim CMR 500 is a fingerprint terminal which can communicate via TCP/IP (Ethernet) and it is suitable for indoor applications with its elegant design.

High Performance

Stylish Design

Easy Installation

Speed Operation

Turnstile Door Opening

Reporting

Communication

Makim CMR 500 Fingerprint Reader with a capacity of 5.000 users is a stylish product designed for access control. It has 200.000 log capacity and has door-turnstile opening function with card + fingerprint access options thanks to the relay (dry contact). The device offers a stable and speed working performance for 5.000 users.

Direct TCP/IP communication provides access to all log information, entry-exit data, employee based authorization, and all reports like daily, weekly and monthly reporting. The device can also be connected to the panel with wiegand in / out and connected with RS485.

The device gives an audible warning in every operation performed with the built-in buzzer feature and the device operates with 12 V. It has 1.6 inch TFT colour screen so that you can follow the ongoing operations on the display. If the user information is registered on the system, it can be seen on the display when you read your card. With all these features, CMR 500 is suitable for not only small business centers, accommodation places or buildings but also big factories, storage rooms, banks, prisons and similar industrial and commercial locations.
